Energy Efficient Design

The CLARITY Series integrates cutting-edge COB (Chip On Board) and Common Cathode pixel technology, setting a new standard in display excellence. These advanced technologies not only significantly reduce energy consumption but also remarkably enhance colour performance, offering a superior visual experience.

Reduced Energy Consumption:

COB and Common Cathode technology are more energy-efficient, leading to lower electricity costs and a reduced environmental footprint.

Enhanced Colour Performance:

Enjoy richer, more vibrant colours thanks to the advanced pixel technology, which delivers exceptional colour accuracy and contrast.

Increased Durability:

COB technology enhances the robustness of the display, making it more resistant to damage and reducing pixel malfunction.

Improved Heat Dissipation:

Common Cathode technology effectively reduces heat generation, ensuring the longevity of the display and maintaining consistent performance.

Smart Screen Mirroring

Multiple mirroring methods including hotspot mirroring, LAN mirroring, and direct mirroring.

Eco-Friendly

Reduced energy consumption and cool to the touch operation results in a more eco-friendly technology solution.

Universal OPS
